

July 30, 2024

Dear Sir/Madam,

Subject: Request for Expert Statement on RESQUAKE Project

I hope this message finds you well.

We are Tyra Generose Clemente, Tyraxl Joe Sabino, and Charles Chantioco, thesis students pursuing a Bachelor of Science in Computer Science at the University of the Cordilleras. Our research team is working on a study titled "RESQUAKE: Simulating Post-Earthquake Damage in Philippine Homes Using Procedural Modeling."

As part of our study, we seek licensed civil engineers' expertise to provide statements regarding the accuracy and reliability of our simulation model. Your professional insight would be invaluable in ensuring the credibility and effectiveness of our research.

We kindly request your assistance in reviewing our model and providing a statement on its accuracy. This can be done through online meetings as soon as possible on any dates between August 1 to 3 2024 (between Thursday to Saturday). Please reply with your preferred time and date. Your contribution will play a significant role in the success of our project and in advancing our understanding of

earthquake damage simulation in the context of Philippine homes.

Thank you very much for considering our request. We look forward to your positive response.

Sincerely,

Tyra Generose Clemente
